

Template

YC-HM157

1. Used for x-ray;
2. 5 pieces per set for Elekta and Varian, and 4 pieces per set for Siments;
3. The thickness of the Elekta and Siments is 10mm, and the Varian is 6mm.

Alloy Melter

YC-HM152

1. Stainless-steel material;
2. It is digital temperature-controlled system;
3. The accuracy of the temperature-controlled is $\pm 1^{\circ}\text{C}$;
4. Maximum amount of molten lead is 80kg;
5. It comes with one iron scoop.

Bolus

YC-HM193

Shape size: 30*30*0.5cm;
Density: 1.02-1.04 g/cm³.

YC-HM194

Shape size: 30*30*1.0cm;
Density: 1.02-1.04 g/cm³.

Beam Block Mold

Model: YC-HM153

1. Used for electronic-ray;
2. Lightweight metal material;
3. Used for Siemens accelerators only;
4. 5 various sizes per set;
5. It comes with bottom board.
